- Dal 2016 Docente corso di Anatomia Umana presso il Corso di Ingegneria Biomedica Università degli Studi di Roma "Tor Vergata"

## Campi di interesse ed Interventi Chirurgici

- Endoscopia digestiva: Esofago-gastroduodenoscopia e colonscopia
- Diagnosi, management e trattamento chirurgico mininvasivo delle patologie del pavimento pelvico
- Manometria anorettale e riabilitazione del pavimento pelvico
- STARR: (Stapled transanal rectal resection) per il trattamento del prolasso rettale e del rettocele
- Proctopessi meccanica sec. Longo
- THD (transanal haemorrhoidal dearterialization) per il trattamento della patologia emorroidaria e del prolasso
- Emorroidectomia
- Trattamento della ragade anale
- Trattamento della stenosi anale e dell'incontinenza anale
- Trattamento mini-invasivo con preservazione degli sfinteri anali nella fistola anale:
  - VAAFT: Video Assisted Anal Fistula Treatment
  - Plug
  - LIFT
  - Permacol
- EPSIT: Endoscopic Pilonidal Sinus Treatment per la cura del cisti sacrococcicea o sinus pilonidalis
- Chirurgia mini-invasiva e laparoscopica per il trattamento di ernie e laparoceli della parete addominale e trattamento dell'ernia iatale e della malattia da reflusso gastro-esofageo, appendicite.
- Molte altre procedure di chirurgia generale come: chirurgia della tiroide, colecistectomia laparoscopica, chirurgia della mammella, chirurgia del colon

## Capacità e competenze sociali ed organizzative

- Ottimo spirito di gruppo. Capacità di adeguamento ad ambienti multiculturali. Ottima capacità di comunicazione, trasmettendo efficacemente un'informazione (soprattutto nel rapporto con il paziente e tra collaboratori e personale).
